Med Docket™

Med Docket™

"Never knew my clinical practice data could be managed so effortlessly.

This has made not only my life but also my patient's lives easy."

Med Docket™ CMS

Med Docket™ CMS

THE ELECTRONIC HEALTH RECORD SYSTEM THAT REVOLUTIONIZES MEDICAL DATA STORAGE AND ACCESS.

Med Docket™ is a portal which allows you to store, access, update and organize your clinical practice related information in a secure and convenient location on the web. It can be instantly accessed from anywhere in the world.

Clinic Management System

Clinical practice involves maintaining lot of data – medical, financial and administrative.

For any busy practitioner, streamlining the workflow and effective data management are extremely vital for smooth functioning of the clinic.

Furthermore, not just the amount of data but even its type varies from doctor to doctor. Hence, the need for a system which not only aids in effective clinic management but also allows customization as per the doctor's individual needs.

Med Docket CMS effectively takes care of your data management needs.

Armed with the best-in-class features to capture relevant data, Med Docket effectively integrates all activities involved in running of a clinic, at the same time helping you to make your clinic paperless. It's so easy-to-use that your non-medical support staff can take much load off you – so you can focus on your patients and practice.

Key Benefits offered by Med Docket Clinic Management System.

Helps efficient management of medical practice:

- Appointment scheduler – Log patient appointments across all your clinics and receive a daily appointment list by email

- Send SMS and Email reminders to patients for appointments, immunization visits etc

- Configurable structure allows each practitioner to customize the fields as per requirements

- Complete clinical history – Record patient data systematically for proper analysis, diagnosis and treatment

- Physical examination – Record and analyze data to see the trends

- Direct result entry by diagnostics – Paperless referral to labs, automatic update of test results in patient records

- Images upload – Patient images stored on central server; makes you 'hardware-independent'

- Automated medical summary generation – At one click, view and print summary

- Electronic prescription – Quick and easy; does away with handwriting-related issues

- Referral analysis – View referrals made to other doctors/laboratories, referrals received from other doctors and respective patient details

Aids in management of finances:

- Electronic bills and receipts – Automated generation of standardized bills and receipts tightens control over financial transactions

- Collection tracking – Keep a close eye on daily collection

Manages administration:

- Roles and rights – Customize staff roles as needed and assign CMS-access rights as per requirement

- Inventory management of drugs – Take stock of all supplies

- Connect all practice locations – Seamless practice across all your clinics

- Reminders – For professional events, meetings or important tasks, opt for SMS/email reminders Stay connected with your patients – Send email/SMS to patients for reminders, educational materials, greetings, etc.
