Rajiv has a chest pain on flight
His destination is 45 minutes away ...
His medical reports are at home a
1,000 kms away . . .

There isn't much time...

**Med Docket is an advanced,
secure Electronic Health Record system
that empowers you to manage
health better.**

- + Medical records can be easily stored in a systematic manner.
- + Med Docket is easy to use even by a lay man & yet gives all the details required by medical practitioners.
- + Data privacy maintained: A secure login makes sure that the health records cannot be viewed or accessed by another person unless you choose to reveal it to them.
- + Easy to access & retrieve.

NO NEED TO WORRY
HELP IS AT HAND WITH

Med Docket™

A REVOLUTIONARY CONCEPT
IN HEALTHCARE

Med Docket™ is a portal which allows you to store, access, update and organize all your health related information in a secure and convenient location on the web. It can be instantly accessed from anywhere in the world. All it needs is an internet connection!

- + Med Docket reflects the complete medical history.
- + No limit on the amount of data stored.
- + Med Docket gives a holistic health profile with pages such as personal information, medical history, physical examination, medication, lab. tests, images, medical summary, etc.
- + The Medical Summary encompasses all relevant health data entered in your Med Docket.
- + Unweildy X rays, CT scans, MRI are digitized for effective handling.
- + Your laboratory parameters generate graphical trends.
- + Med Docket serves as a concise health horoscope of the individual.

**Security features that generate peace of
mind**

- + Data encryption
- + User authentication security
- + Personnel policies
- + Internal audit
- + Contingency plan
- + ISO 27001, HL 7 & HIPAA compliant

**Med Docket: The ideal Medical data
storage system for professional
organizations**

- + Medical data mobility : Instant access to medical reports from anywhere in the world at any time especially in times of emergency or while traveling.
- + Helps analyze the gradual changes in health trends of the valuable assets (i.e. human resource) of the company which would otherwise go unnoticed.
- + Med Docket ensures increase in productivity by helping employees manage their health better.
- + Share Med Docket When an employee is traveling or working on-site he can share his health details on Med Docket with a doctor and take an online consultation or a 2nd opinion from any doctor across the globe.
- + Facilitates easy and quick settlement of claims under corporate mediclaim policy.
- + Helps eliminate duplicate health check-ups thus decreasing health care cost for the company.
- + Reduction in paper work - paperless way of record keeping - reduction in stationary cost.
- + Powerful tool to express corporate responsibility towards its employees.
- + In house doctor's time is saved.
- + Better health management.
